

LOSBERGER DE BOER

committed  
to your success

**What success are you striving after?** Do you wish to fascinate people during a show, event, exhibition or trade fair? To overcome particularly challenging set-up conditions in a timely and professional manner? Or maybe you must rapidly create additional space – be it for a kindergarten, offices, storage, production or the sale of products. Or is it your job to set up the all-important base for an aid mission with temporary structures in crisis regions?

“We want to achieve the best customer experience.”

Arnout de Hair, CEO, Losberger De Boer

**Turnkey modular space solutions**

Whether a fully functional, creative room concept for an event, industrial application or local community accommodation, whether rental or purchase, we always strive to make life easier for you by delivering the best total solution for your needs.

We commit 100% to your project with involved advice, premium quality, ingenious modular space solutions, professional engineering expertise and the necessary creativity to ensure that your project is completed reliably and to schedule.

We are here to meet your challenges and our main drive is to make sure you achieve your goals.

We are Losberger De Boer,  
**committed to your success**

## In the limelight, at the heart of Berlin: Losberger De Boer.

Renowned designers, top models and fashionistas from around the world: the Mercedes-Benz Fashion Week in Berlin is one of the leading events in the fashion calendar – and since 2008, inconceivable without space solutions from Losberger De Boer.

A 155 metres long, two-storey fashion tent helped turn the Straße des 17. Juni into an impressive catwalk. Erected in the middle of one of the metropolis' main traffic arteries, a 3,400 m<sup>2</sup> space for the zeitgeist of fashion was set up and subsequently dismantled within the space of just a few days in a timely manner without a hitch.

The industry event venue was in no way inferior in terms of its elegance and aesthetics. Indeed, spacious presentation areas, high-quality interiors, unique colours and lighting, transparent wall elements, opaque façades and a gallery created the perfect ambience for the leading international designers' shows. After the event, the organiser not only highlighted the uncomplicated, timely set-up and dismantling, but also made specific reference to the "highlights in tent construction" and how it had received "extensive praise for the set-up from a great many international colleagues and partners".

**Berlin Fashion Week is just one of many examples of event tent rentals offered by Losberger De Boer. For events both large and small; festivals, concerts, exhibitions, sporting events, trade fairs and congresses: The possible uses of our temporary space solutions know no bounds.**

**In Event rental, our range is not only limited to tents, pagodas and halls, but also includes meticulous planning of the furnishings and the organisation of qualified service providers for catering, decoration, heating, air conditioning and tent security.**

**Besides top quality materials, workmanship and designs, particularly speed and reliability are important here. At Losberger De Boer, you can always count on experienced project managers, construction managers and supervisors for timely set-up and rapid dismantling. Allowing you to concentrate 100 % on what really matters: your event's success.**

### Our offers in the field of event tent rentals:

## 0 % delays, 100 % reliability: Losberger De Boer.

At first, it was just an idea: Canadian singer and entertainer Gregory Charles envisioned a unique mobile music theatre with 1,000 seats and a large show stage – the “Vintage Theatre” – for his interactive “Vintage” show. His manager subsequently approached Losberger De Boer for advice.

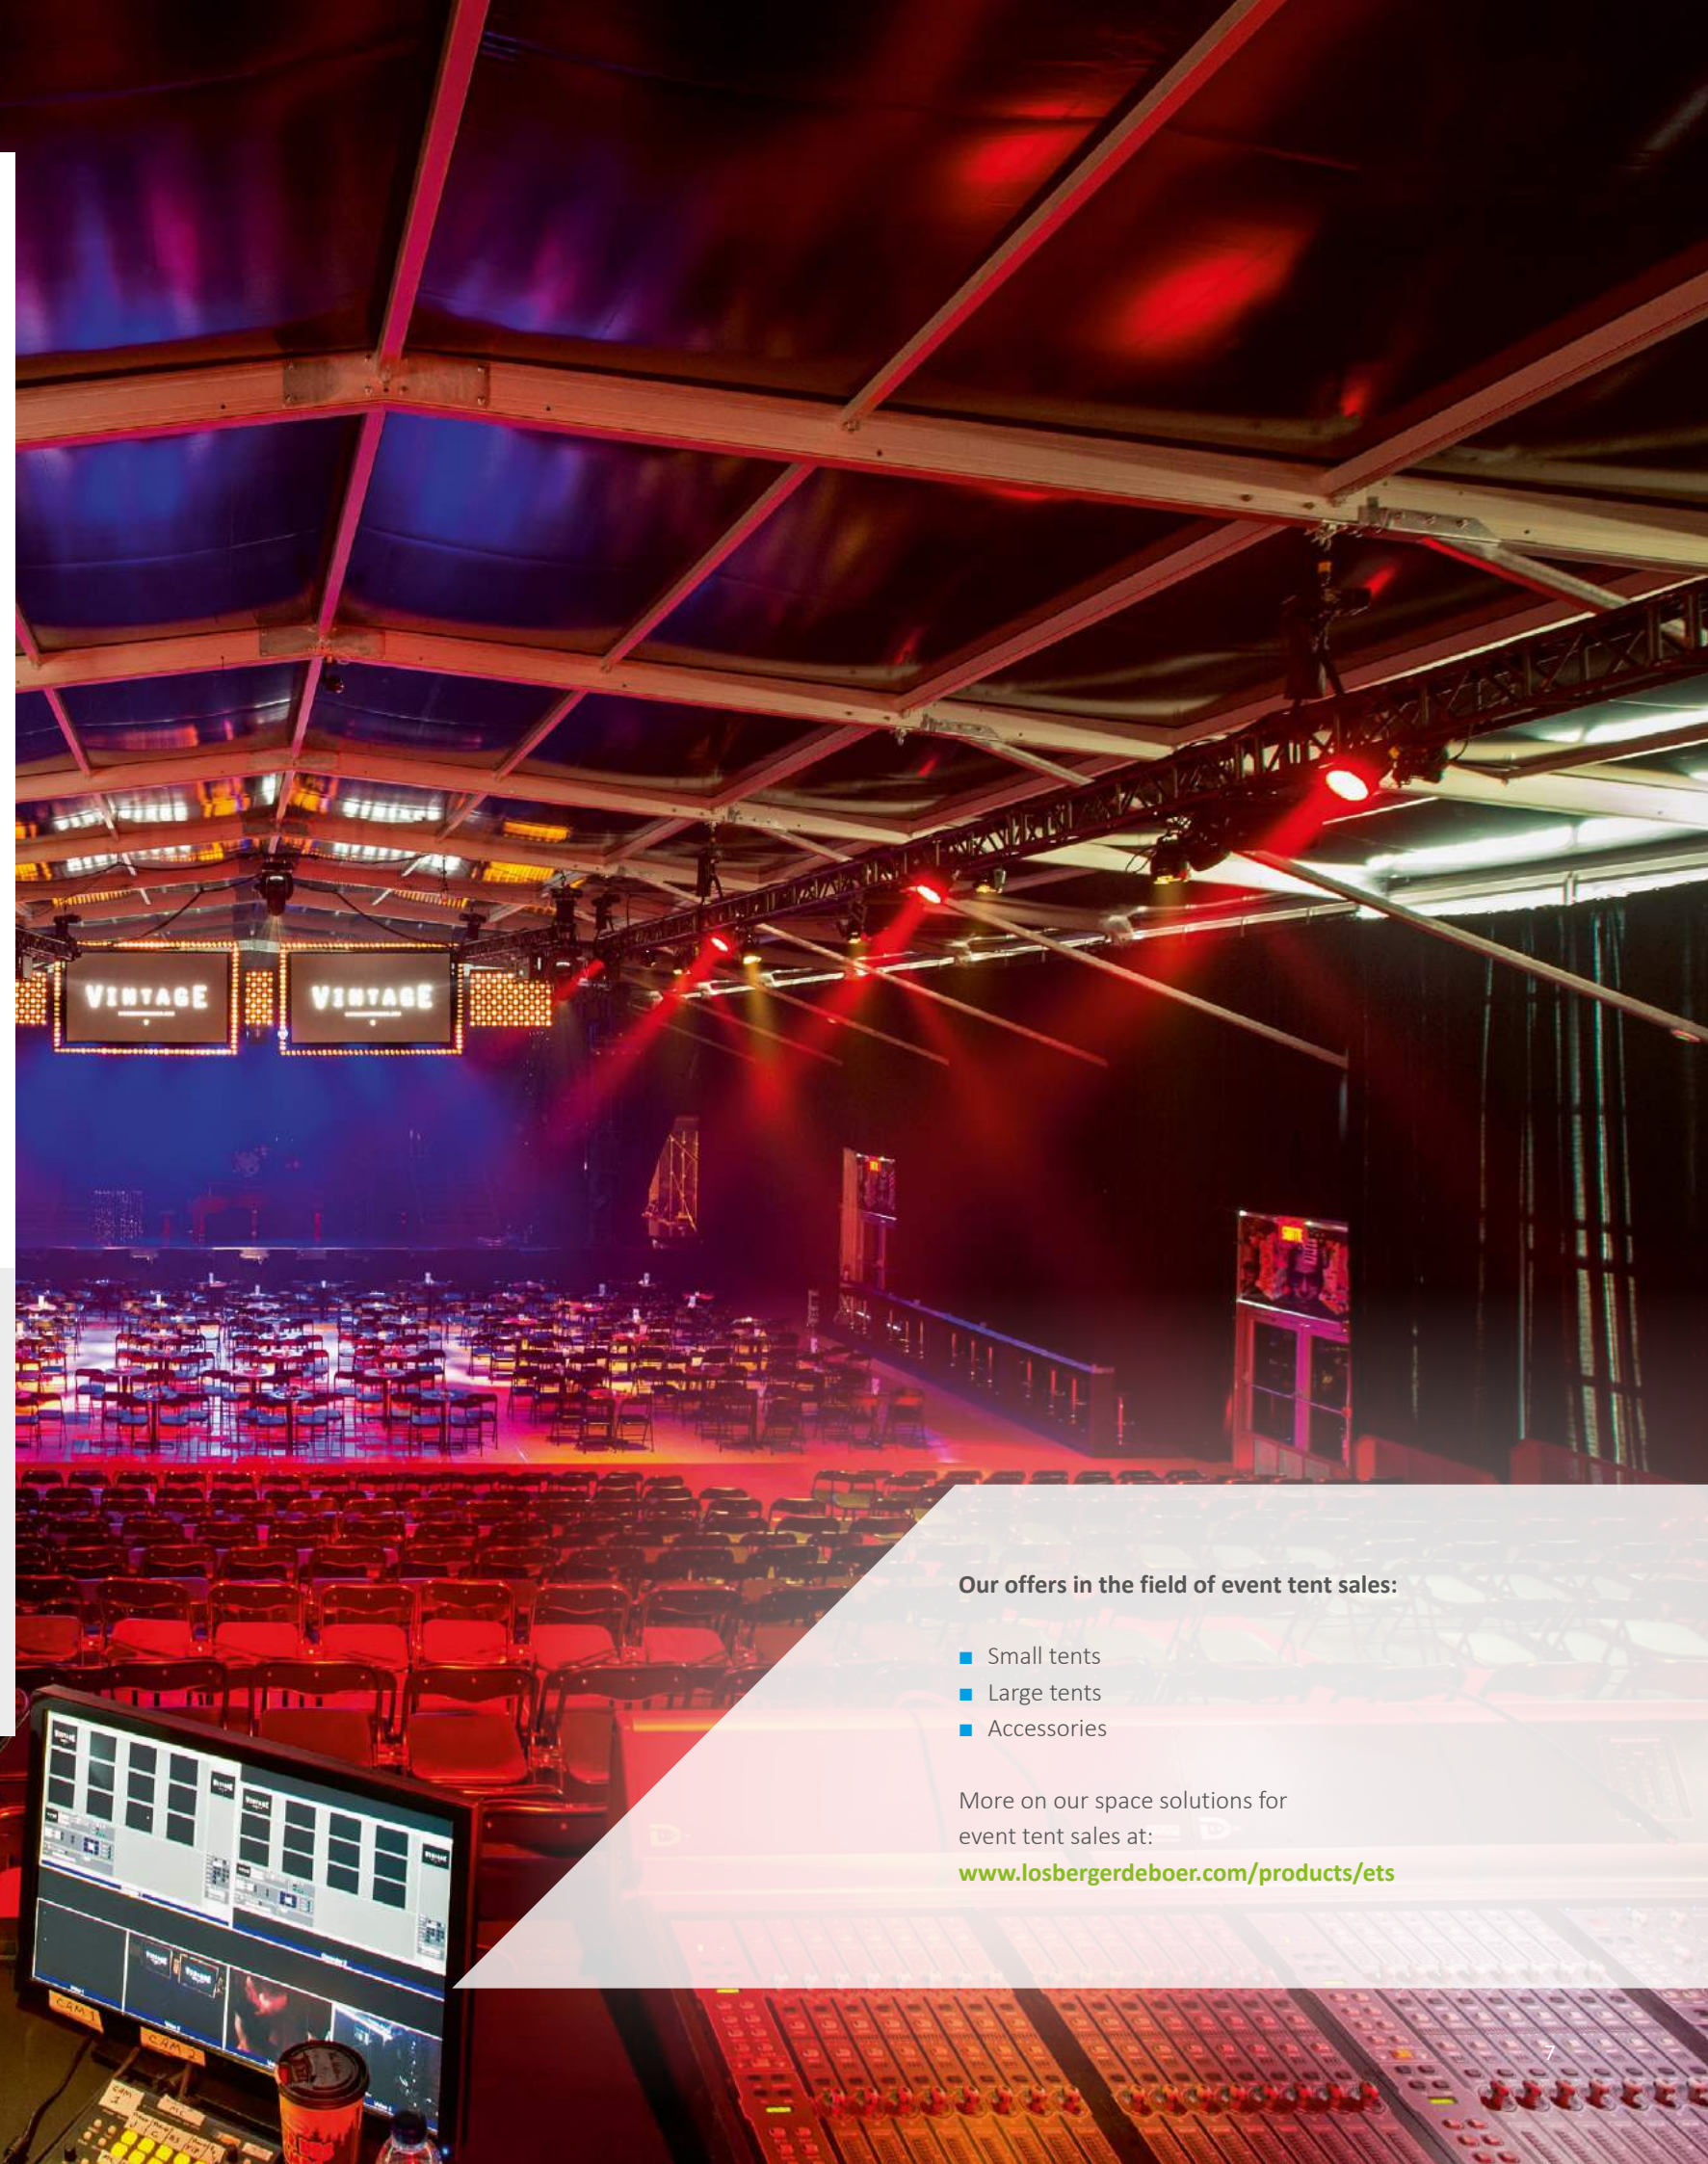

The spacious Palas event hall featuring elegant cubic architecture proved the perfect solution. Despite its length of 55 metres, impressive side height of 8 metres, 2.5 metres high all-round balcony and two staircases, it can be set up and dismantled anywhere in the space of just a few days. Losberger De Boer was also able to fulfil the artist’s special request for the façade: vertical black panelled PVC walls elegantly complement the horizontal glass elements.

After a construction period of just ten days, the tent was ready: “Vintage” celebrated its world première on the Jacques Cartier Pier in Montreal’s Old Port. The first of many unique shows all around the world.

**Creative and functional spaces for receptions, gastronomy, sporting events, exhibitions and trade fairs: the applications for event tent sales start with village fairs and weddings and go far beyond the world tours of musicians and entertainers like Gregory Charles.**

**They create the perfect backdrop for all kinds of events and therefore form the basis for the perfect hospitality. With a pillar-free width of three to 50 metres and covering one to two floors, our modular construction systems enable rapid, simple and affordable solutions for your size, shape and furniture configuration requests. Within this, our customers particularly value the uncompromising product quality and high degree of expertise and commitment from Losberger De Boer’s customer service team. And particularly the good feeling of having invested in a permanently functional space solution.**

### Our offers in the field of event tent sales:

- Small tents
- Large tents
- Accessories

## More lasers, more output: Losberger De Boer.

Welding, cutting, layering, tempering, inscribing and dismantling: the applications of tool lasers have multiplied in recent years. It perhaps therefore does not come as a surprise that a laser cutting machine manufacturer like Trumpf requires new production, assembly and storage capabilities quickly.

Against this backdrop, Losberger De Boer and SCD architecture firm were commissioned to design and construct a 70 metres long, two-bay steel hall for the assembly, testing, order picking and packing of laser cutting machines. Additional roof loads had to be taken into consideration flexibly, as did an awning extending 6 metres over the entire width of the hall for the loading and unloading of lorries in all weathers.

The construction time was naturally also critical. So how long did it actually take? Just ten weeks from the start of construction to the set-up of employees' workstations!

More on the Trumpf project: [www.losbergerdeboer.com/case-trumpf](http://www.losbergerdeboer.com/case-trumpf)

**Whether assembly, packing or storage, persistent space shortages cost companies time and money. Individual hall construction, uniform hall structures in a modular system, and industrial or storage tents that can be set up and dismantled by Losberger De Boer particularly quickly allow you to grow exactly where you need it. And that exactly at the pace you set.**

**Not only do we design the dimensions and furnishings for your hall according to your requirements. We also ensure problem-free acquisition of planning approval, solid pre-construction drawings, and competent planning and organisation of foundation work.**

**We also offer our customers the freedom they require when it comes to the financing: buy, lease or hire – at Losberger De Boer, you always have the choice. Seize the opportunity to react rapidly and in a needs-oriented manner to changes in your order situation.**

### Our offers in the field of industrial buildings and temporary warehouses:

- Individual halls
- Modular halls
- Industrial and warehouse tents

## In a pleasant atmosphere, with foresight: Losberger De Boer.

How can you rapidly create attractive and at the same time flexible offices and useable space? After already having extended its storage and order picking capacities with the construction of two COMPACT halls, ship chandler Amaro commissioned Losberger De Boer's subsidiary Losberger Modular Systems to construct a new administrative building meeting the highest quality and aesthetic requirements.

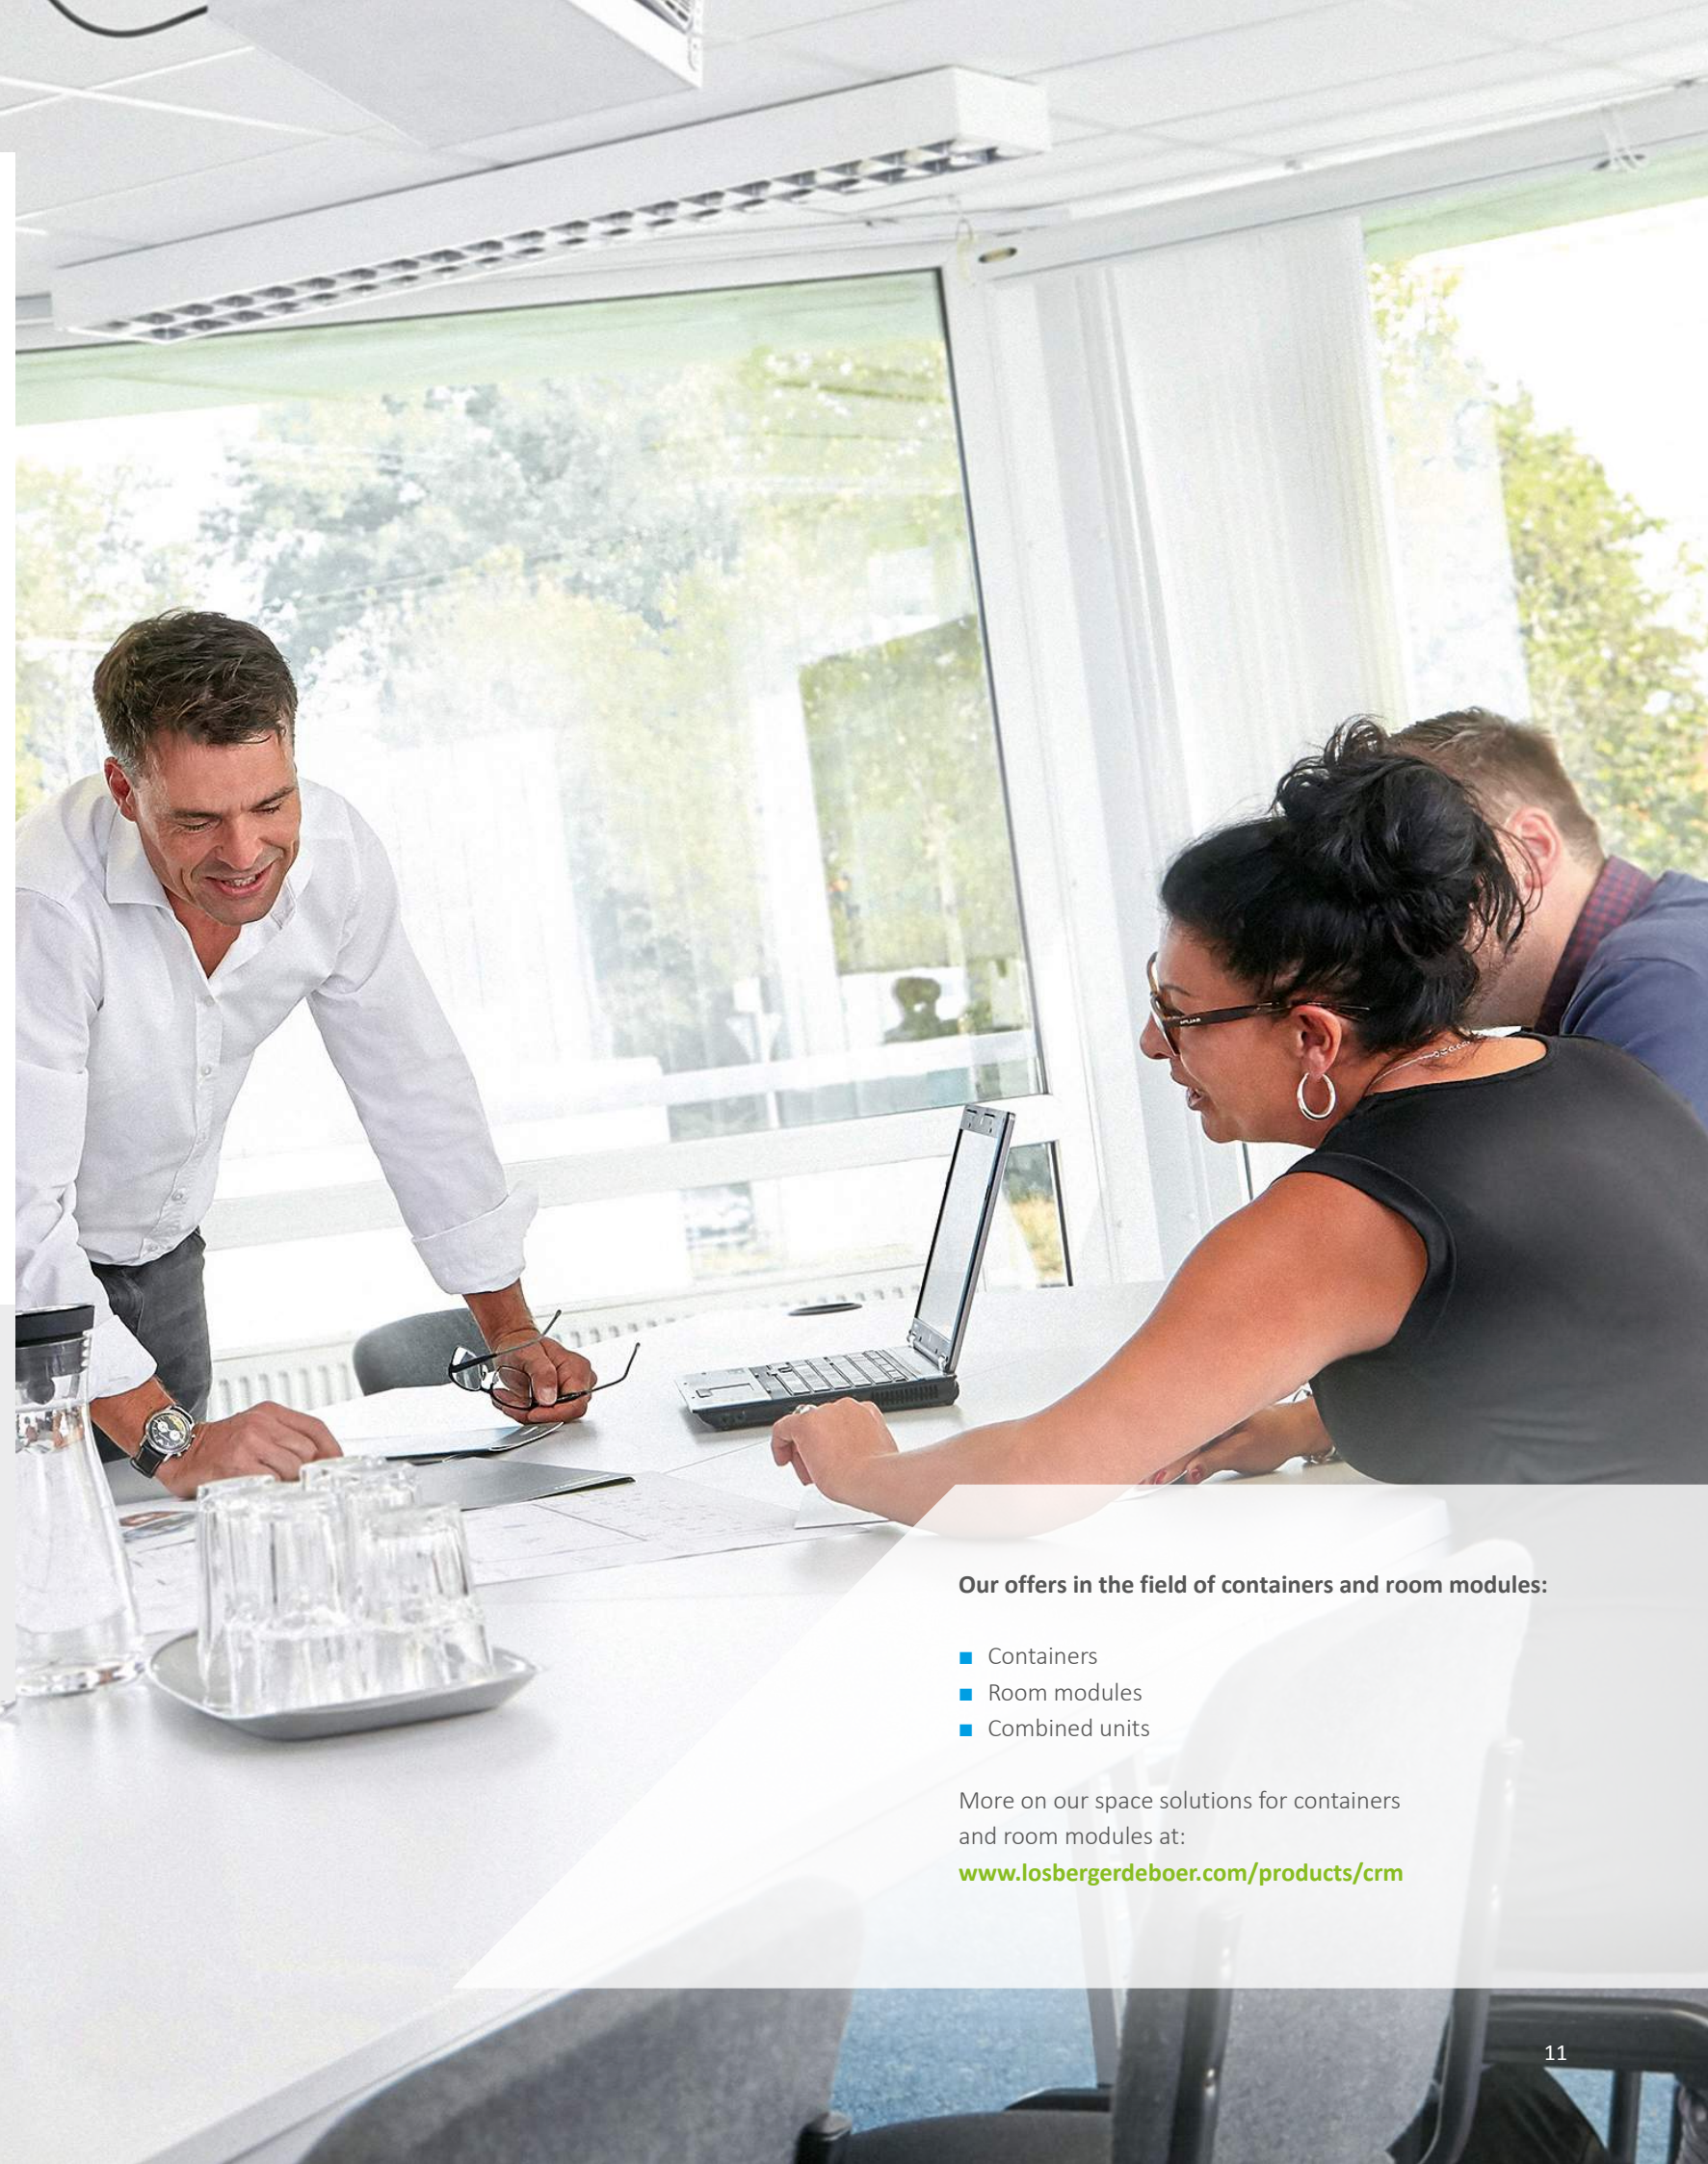

In less than five weeks, five offices of different sizes, a meeting room with adjoining kitchen, a utility room and entirely tiled sanitary facilities were set up in a timely manner on 270 m<sup>2</sup> using 15 room modules. Inside, an air heat pump ensures consistent pleasant room temperatures. A fish pond in the entrance area in front of the building completes the high-quality overall look.

And what's so special about this representative space solution? The single-storey building can be extended by up to a further two floors, thus enabling the rapidlygrowing company to react to future space requirements at short notice.

More on the Amaro project: [www.losbergerdeboer.com/amaro/en](http://www.losbergerdeboer.com/amaro/en)

Besides sophisticated office designs, there are of course many other applications for the practical containers and room modules by Losberger Modular Systems. As simple accommodation and storage containers at building sites, as representative sales pavilions, or even as entire building complexes for kindergartens and schools.

Our 3001 PLUS standard container developed in-house that can be furnished and combined in a variety of different ways, allowing us to create exactly the space solution that you need. A high-quality, sustainable investment that we set up for you in a reliable, timely and above all affordable manner. Promised.

### Our offers in the field of containers and room modules:

- Containers
- Room modules
- Combined units

## 100 % commitment in the toughest conditions: Losberger De Boer.

Gao in Mali: as part of its peace mission for political stabilisation of the West African state, the United Nations had to set up a 100-man camp in the shortest of times that would serve as accommodation and administrative headquarters in the field for the UN workers and their visitors. Losberger De Boer was rapidly identified as the ideal partner for the tents and their set-up.

In temperatures of up to 48 °C, windy and dusty conditions and with the according time pressure, inflatable tents were the best solution. They are easy to transport, can be set up particularly quickly and offer reliable protection from the heat and dust. Losberger De Boer also contributed four generators to supply power at the camp and supported the aid mission in the field with its own team of specialists.

Losberger De Boer fulfilled the promise of a rapid and smooth set up. The feedback on the construction of the camp in the final mission report: with its technology and the competent implementation team, Losberger De Boer contributed decisively to the project's success.

[www.losbergerdeboer.com/products/rds](http://www.losbergerdeboer.com/products/rds)

**For both military and humanitarian or industrial applications, for rescue tents, hospitals, decontamination facilities, hangars, workshops and warehouses in addition to camps with kitchens and canteens, command posts, mobile headquarters with offices: Losberger De Boer has not only proven itself to be the perfect partner for such space systems in Mali. Our solutions are in demand everywhere that infrastructure must be set up in tough conditions.**

**Our comprehensive products range from inflatable structures to large-scale, climate-controlled hangars. What's more, Losberger De Boer RDS also plans and delivers complete turnkey solutions with all the furnishings required for fully-functioning infrastructure. This also applies for special applications such as camouflaging for missile defence or radar stations.**

## Out of conviction. With passion. Losberger De Boer.

The Losberger De Boer name stands for far more than just tents, halls and containers. It also stands for premium quality products and services, a high degree of flexibility and outstanding proximity to customers. This involves everything from listening attentively to developing clever space concepts to assembling unique space systems. Everything from the initial personal consultation regarding the purchase or rental to the construction and supervision at your site will be handled with the utmost care and consideration. In other words, the Losberger De Boer name stands for individual solutions that rapidly provide the necessary space for your plans and ideas.

### **Our philosophy: maximum added value for all involved.**

Within this, not only continuous technical development and entrepreneurial success are the driving forces of our daily work. The most important criterion for our activities is and remains our responsibility to our customers, employees and, last but not least, the environment. We see ourselves as a company that masters the latest challenges in the field of mobile space solutions with passion – whether these are economic, social or environmental in nature.

### **Focus on the future: sustainability at Losberger De Boer.**

At Losberger De Boer, the product, its associated services and their environmental impact are inextricably linked within the context of sustainability. This is reflected in our certification to DIN ISO 9001:2015 and DIN ISO 14001:2015.

We not only consider environmental protection to be an essential management task, but have also set clear aims for our internal and external processes. This begins with a conscious reduction in emissions, continues with the minimisation of raw materials and energy usage, and extends to the avoidance, recycling or (where no alternative exists) environmentally friendly disposal of waste. Not because we have to, but because we firmly believe in it.

### **Losberger De Boer:**

- 1,100 employees worldwide
- 20 locations worldwide
- Representatives in over 50 countries
