

LOSBERGER DE BOER

Pop Up Film and TV Studio Solution

Losberger De Boer proudly presents 'Pop-Up' Film and TV studio based on 10 years of our Acoustic R&D work. Clients amongst others are TV production agencies, Streaming services as well as the COP26.

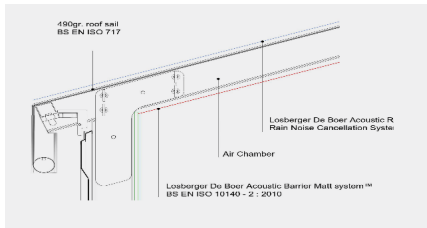

These experiences lead to the introduction of the latest innovative Acoustic Barrier S and Rainguard system™ for temporary and permanent buildings:

- Sound reduction (standard): from 20 to 50+dB
- Class A sound absorption surfaces
- U-value (standard): <0.4
- Structure: side walls from 3 to 12m, apex 6 to 15m

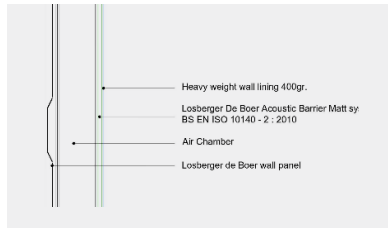

Our studios are quick-to-build, can be scaled, adjusted and even relocated to a new production location, ensuring that you remain flexible when it comes to choosing locations and timeframes for your recordings.
